

mytaptrack® is an educational solution that simplifies the process of collecting data in real time from classrooms, schools, and other learning environments.

Educators capture information with one of mytaptrack®'s innovative, easy to use tracking tools at the time it occurs. Simple clicks send information immediately to a student dashboard where it is documented. Schools and districts simplify data collection, improve accuracy, accelerate learning, and save a ton of time.

The reports, graphs, and documentation can be used to drive more efficient and effective management of IEPs, BIPs, and other behavioral initiatives.

Now available

- **Interval Prompting** - From our browser-based tracking, you can now set prompts at any interval needed in minutes/seconds. mytaptrack will prompt the users visually, audibly or both and allows for momentary time sampling.
- **Enhanced Data Control** - Users now can customize the days that are tracked and exclude days where the student was absent or the data was somehow adversely impacted, providing greater consistency and accuracy.

Summer Product Roadmap - Coming for School Year 21-22

- **Student Assistance Response Tracking** - We are enhancing our communication/support features to allow for better support management when behavior may require additional support in the classroom. This new feature will notify identified person(s) that a behavior is occurring and added support is needed. The person(s) will reply that are responding, and allow for tracking of response times, resolution times, and ability to capture when the support has concluded and details on the support provided.
- **ABC Reporting** - We are creating a report to interpret information into ABC (antecedent-behavior-consequence) organization.
- **Mobile App Enhancements** - Adding verbal note taking to our new mobile app tracker. This will allow educators to capture anecdotal data at the time of occurrence from our mobile app.
- **Parent Reporting** - We are creating an effortless way for educators to create parent communication regarding their student's data.
- **More Robust Notification Options** - Expanding our notification options to include when targets, goals, or other criteria are met. Powerful notifications and insights to help motivate students.
